DATS'10 is the Piedmont Triad's annual Design, Arts & Technology Symposium, a collaborative event helping to grow the region's economy by connecting businesses with creative talent development.

This year's event will include intriguing displays of holograms and high-speed video. Wide-ranging designers, artists and technologists will exhibit innovative works while area cooks feature dishes created with the Stokes County purple sweet potato and other locally grown delicacies. Several members of the MIT community will describe implementations of leading-edge research.

It all happens October 9-11 in downtown Winston-Salem, including a celebration of international Powers of Ten Day on 10.10.10!

If you are a student, you can join the fun at half price and get connected with other thinkers, doers and potential employers. Register now...

If you are a practitioner, you'll love this opportunity to renew contacts, hone knowledge and peek into the future by interacting with our outstanding speakers. Register now...
