If the answer is YES to any of the above questions, UNC School of the Arts requires that you receive

TB testing as soon as possible but at least prior to the start of your summer intensive program.

Acceptable TB screening tests include:

- Tuberculin Skin Test (TST) or,
- TB blood test (QFT-G or T-spot).

The TST or TB blood test must have been done within the 12 months prior to the start of the summer intensive pagrmas. Documentation of the TST is acceptable only from a United States facility.

Many people born outside of the United States have been given a vaccine called BCG. TB blood tests are the preferred method of TB testing for people who have received the BCG vaccine.

If the answer to all of the above questions is NO, no further testing or further action is required.

^{*} The significance of the travel exposure should be discussed with a health care provider and evaluated.

UNCSA High School Medication Policy

It is the policy of the University of North Carolina School of the Arts that high school students check their prescription medications, in the original prescription bottle, in with Health Services. Health Services will determine if the student may keep the medication in their room, or if it will be retained by Health Services and dispensed. The purpose of this policy is to:

- Assist the student with compliance and reordering medications
- Prevent and control loss and theft of medications
- Prevent abuse of medications
- Document medication compliance

The medications that must be checked in with Health Services are:

- Medications used to treat depression, anxiety, mood or bipolar disorders
- Medications used to treat Attention Deficit Disorder
- Seizure medications
- Controlled medications containing hydrocodone or other powerful pain relievers

It is required that high school students who live on campus have the necessary maturity and organizational skills to take their own medication on a daily basis.

Policy for Dispensing High School Medications:

Students present to Health Services for pickup of a 7-day pallet of medication on a weekly basis. Students can pick up their weekly pallet of medication from Health Services on Monday or Tuesdays between 8:00 am-4:30 pm.

Students and parents are responsible for reordering medications and having them delivered to Health Services. If Health Services is closed the medications are to be placed in the lock box located in the Campus Police Lobby. Students will be notified when they are running low on medications. Summer Intensive students should only bring the number of pills needed for the duration of Summer Intensives.

A new pallet of medication will not be dispensed to high school students presenting to Health Services less than 5 days from the previous medication pick-up, without consent and telephone authorization from a parent. Telephone authorization from a parent is also required for students presenting to Health Services for replacement of lost medication if less than 5 days from the previous medication pick-up.

Health Services is not responsible for a student's medication once a student has received their medication and leaves Health Services. If a high school student has missed their weekly pallet pick-up, the student's parent and/or guardian, and Director of High School Life/Director of Summer Intensives, will be notified. Please make sure we have correct phone and email contact information for this purpose.

*At the end of each semester/Summer Intensive/school break when students leave campus, additional and/or remaining medication will be released to high school students unless Health Services is notified by a parent not to release additional and/or remaining medication. Please note that Health Services is prohibited by law from mailing drugs through the U.S. Postal Service.

The remaining medication that is not picked up 2 weeks post commencement or 2 weeks post end of Summer Intensives will be disposed of.
